

LOCAL DIVIDEND SHARE PORTFOLIO

SA Asset Management Local Dividend Share Portfolio

As of 2026/09/30

Overview

The SA Asset Management Local Dividend Portfolio aims to provide investors with a dependable and consistent income stream through dividends. The portfolio will be strategically diversified and will invest in reputable established companies with a history of reliable dividend payouts. Our priority lies in selecting companies that have demonstrated consistent dividend growth, indicating strong financial stability and a commitment to rewarding shareholders.

The main objective of SA Asset Management is to build a private portfolio based on in-depth discussions with each client to achieve the specific goals that has been set through mutual agreement. The portfolio will be biased towards market-leading companies and will invest in the South African market.

Investment Criteria

Our investment strategy is to hold long-term positions in large cap companies with a market cap greater than R10 billion, which shows high investment quality across different business cycles while keeping a strong earnings growth through these periods.

Risk Description

A growth investor values long-term inflation beating returns at moderate to high levels of risk. An investor may endure temporary drawdowns in capital value over the medium to long term, in exchange for longer-term capital growth. This portfolio holds a high exposure to equities, which in turn increases the portfolio's volatility.
