SA ASSET MANAGEMENT LOCAL SHARE PORTFOLIO

As of 2026/10/31

Overview

The SA Asset Management Domestic Share Portfolio is an equity portfolio designed to provide investors with direct exposure to locally listed South African companies. The portfolio is constructed to reflect the investor's specific risk appetite and long-term objectives, developed through a detailed and consultative process.

The main objective of SA Asset Management is to build a private portfolio based on in-depth discussions with each client to achieve the specific goals that has been set through mutual agreement. The portfolio will be biased towards market-leading companies and will invest primarily in the South African Stock Market.

Investment Criteria

Our investment strategy combines momentum and quality, focusing on stocks that exhibit strong price trends supported by institutional flows. We apply a quality overlay to ensure we invest only in companies with robust fundamentals. To manage liquidity risk, we prioritise large-cap shares with meaningful market depth. The portfolio is reviewed quarterly and rebalanced as necessary to remain aligned with our highest-conviction opportunities and prevailing market dynamics.

Risk Description

This is a high-equity growth portfolio suited for investors seeking long-term, inflation-beating returns and who are comfortable with moderate to high volatility. The investor may experience short- to medium-term drawdowns in capital value, but with the aim of achieving long-term capital growth through disciplined portfolio construction and stock selection.
